DATE MAILED: 04/16/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

**Advisory Action**

Application No.

09/826,811

Applicant(s)

GOLD ET AL.

Examiner

Baoquoc N To

Art Unit

2172

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 23 February 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

**PERIOD FOR REPLY [check either a) or b)]**

- a) ☒ The period for reply expires 1 months from the mailing date of the final rejection.
- b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. ☐ A Notice of Appeal was filed on \_\_\_\_\_. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2. ☐ The proposed amendment(s) will not be entered because:
- (a) ☐ they raise new issues that would require further consideration and/or search (see NOTE below);
  - (b) ☐ they raise the issue of new matter (see Note below);
  - (c) ☐ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
  - (d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: \_\_\_\_\_

3. ☐ Applicant's reply has overcome the following rejection(s): \_\_\_\_\_.
4. ☐ Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5. ☒ The a) ☐ affidavit, b) ☐ exhibit, or c) ☒ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.
6. ☐ The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7. ☒ For purposes of Appeal, the proposed amendment(s) a) ☐ will not be entered or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: \_\_\_\_\_.

Claim(s) objected to: \_\_\_\_\_.

Claim(s) rejected: 21-47.

Claim(s) withdrawn from consideration: \_\_\_\_\_.

8. ☐ The drawing correction filed on \_\_\_\_\_ is a) ☐ approved or b) ☐ disapproved by the Examiner.
9. ☐ Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_.
10. ☐ Other: \_\_\_\_\_

  
ALFORD KINDRED  
PRIMARY EXAMINER

Continuation of 5. does NOT place the application in condition for allowance because: The Examiner maintains the grounds of rejection of claims 21, 30, 32, 36 and 39-40.

The applicant argues "Saxon has no disclosure of limitations (2) comparing the total file size data allocated for backup of the particular client computer with a predetermined size limit; and (3) determining whether to backup the particular client files or not depending on the comparison"

The examiner respectfully disagrees with the applicant argument because Saxon teaches the concept of backing up file from multi-clients by determining the maximum size threshold (col. 3, lines 1-18 and column 7, lines 19-50), which is the same concept of backing up a particular client computer as present invention. The backing up multi-client is the same as backing up for a particular client because the same concept is utilizing.

The applicant also argues "the portion of Saxon relied on by the examiner to make obvious backup from a client computer does not indicate a client computer is at all involved in making a backup determination, and a particular a backup determination based on total backup file data size of that client computer."

The examiner respectfully disagrees with the applicant argument. As Saxon states backing up multi-clients computer system by determining the total size limit for backing up the files (col. 3, lines 1-18). The columns 5, as mentioned in the previous office action, utilizing by the examiner to point out that the Saxon system having the client which equivalent to the particular client of the present invention.

Claims 22-24 are rejected under the same reason as claimed 21.

The applicant argues "the reliance by the Examiner on column 7, lines 46-60 of Saxon for the feature of the backup computer determining a file size limit representing a limit of total size file for each client computer, for which backup of files is permitted, is wrong."

The examiner respectfully disagrees with the applicant because the concept of backing up file wherein determination is made by comparing the threshold of file sizes to be backup (col. 7, lines 40-67). The conceptual of backing up file from multi-client or particular client is the same. If the conceptual of performed backing up multi-clients, so does the particular client computer by one ordinary skill in the art.

Please see the same argument for claims for claims 21 for all claims 32-35 and (col. 3, lines 1-17 and col. 7, lines 41-67).

The applicant argues "Saxon has no disclosure of any details of a client computer, no less client computer with a processor that receives a first quota limit from a external source, wherein the first quota limit describes an amount of data storage capacity the client computer is permitted to maintain for client files subject to backup process."

The examiner respectfully disagrees with the above argument because the sizes of the selected files in each identified save set are then added to give a new save set size (co. 3, lines 1-3). Save set is the quota limit according to the claimed invention.

Please see same argument for the claims 27-38.

Applicant argues "Saxon does not disclose two quota limits. In addition, Saxon does not disclose making the determination vis-à-vis a client computer. Further, as previously discuss, the quoted portion of Saxon does not disclose generating a warning signal"

The examiner respectfully disagrees with the above argument because in Saxon the total size is compared to the maximum size threshold to determine if the total size is less than or equal to the maximum ...if the threshold has not been reach and there is no "next most recent save set" at step 64. Then the method of the illustrated embodiment terminates at step 70 since the method cannot stay within the maximum size limits (col. 7, lines 41-67), are the multiple conditions or threshold regarding backing up the maximum size. It is known when the operation is failed to perform the backing up operation to notify the user. It is the same with generation of warning signa

Please see the above arguments for claims 40-42.
